Specification Sheet

Invoicing Interface

A powerful invoicing interface that integrates seamlesslesly to KIS, QuickBooks or Infinity series of Accounting.

Easy to Use Invoicing: The Invoice Interface retrieves data generated by GraphiTech's Estimator, Job Costing or Order Entry modules and posts the

Historical Ledger

appropriate revenue, sales tax and freight to either a third party accounting program or to GraphiTech's KIS Accounting.

The Invoicing program posts data in an IIF format that QuickBooks is able to import and convert, whereas both Infinity and KIS use direct access to the database.

Distributions are auto created or manually en-

tered on line by line basis. When the invoice is printed, it is posted to the appropriate file (identified as GT082206.iif for example), and then further posted to the Graphi-Tech Historical Ledger database as shown here.

complete history of customer for every invoice created. Easily look up job number, invoice, PO, description, invoice date and more.

Ledger QuickBuild: Easily add data to your historical ledger without creating an invoice. Ideal for invoices that have

Invoicing: Prints on Pre-Printed forms and exports full Revenue, Sales Tax Payable, Freight and Accounts Receivable distributions. Also includes items suc as Terms, Sales Rep, Ship Date, Shipping Company and Messages.

already been created.

QuickBooks Import:

Print a complete report showing items to be imported for

verification, then Import with a single click. Items that are invalid are given a warning but may be imported anyway, as desired. Instant invoicing: This is accomplished by

Estimating. The invoice screen is then completely filled out. If multiple parts are assigned to a job number, then each line of the invoice will

> The Millennium Accounting Interface is compatible with all versions of Quick Books through 2013.

be automatically filled

out with those parts.

This program has been tested on the following operating systems: Windows 98, XP, Vista, Windows7-32 & 64. To run this program on a Macbook Pro w/retina display, we recommend Bootcamp.
