# Specification Sheet

Press Scheduler

A Fully Automated Scheduling of Critical Presses and
Employee Resources. Eliminates Hours of
Costly, Manual Scheduling Every Day!

GraphiTech's Millennium Press Scheduler is an extremely user friendly, highly sophisticated Critical Path and Resource Limiting Scheduling System.

Designed for use where press work is the primary constraint on schedules, this unique program allows each estimator to have the job automatically loaded to the schedule when the work order is printed!

When management then reviews the schedule for each employee, they may alter, remove or add additional time to the schedule, on demand.
A typical Bar Chart identifying the work load of an employee provides immediate insight into

Every morning, simply print out the daily schedule by hitting a single key. Each Press Resource Schedule identifies the Job to be worked on, the estimated start and stop times, remaining time and lunch breaks.

The on-screen and printed Gantt Display permits a rapid review of each employees' schedule as well as providing daily scrolling capability from day to day and hour to hour on a real-time basis.
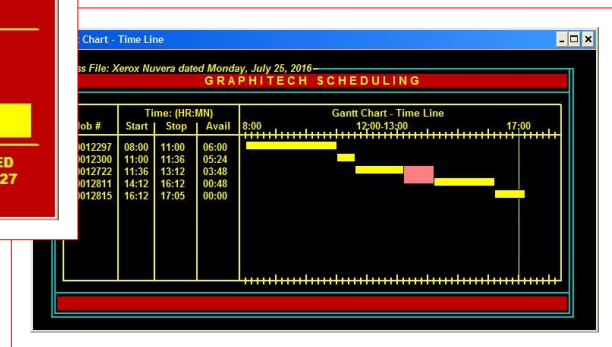

The Work-in-Process listing permits management to rapidly identify any jobs which have exceeded their due dates. This particular screen also doubles as a safety net by identifying any job which is past due and has not been invoiced, thus eliminating the possibility of a job being removed from the plant without proper documentation and/or invoicing!

The GraphiTech Press Scheduler is a unique and

the over time of the employee and the level of loading on each press for the week. And a Bar Chart is available for each employee resource.

systematic approach to the problems of scheduling. And best of all, it is fully automated and totally affordable!

Order Today. It is compatible with both Professional and Digital Estimating programs.
